

- 19
530. Evaporated films of CdS.
P. H. Wendland, *J. Opt. Soc. Amer.*, **52** (5), May 1962, 581.
- 19
531. Use of convergent and divergent illumination with plane gratings.
M. V. R. K. Murty, *J. Opt. Soc. Amer.*, **52** (7), July 1962, 768–773.
- 19
532. Problem of realizing the primary standard of light.
C. L. Sanders and O. C. Jones, *J. Opt. Soc. Amer.*, **52** (7), July 1962, 731–746.
- 19
533. Prediction of absorption loss in multilayer interference filters.
L. Young, *J. Opt. Soc. Amer.*, **52** (7), July 1962, 753.
- 19
534. A spectroscopic study of the plasma in the Philips Pulse Discharge.
O. S. Pavlichenko and L. A. Dushin, *Optics & Spectrosc.*, **12** (5), May 1962, 301.
- 19
535. Investigation of ZnS–Cu crystal phosphors by the Exoelectron emission method.
I. V. Krylova, A. S. Shashkov and N. I. Kobosev, *Optics & Spectrosc.*, **12** (5), May 1962, 353.
- 19
536. New luminors. Cadmium and zinc chlorides, activated with sulfides.
A. M. Gurvich, *Optics & Spectrosc.*, **12** (5), May 1962, 360.
- 19
537. Luminescence kinetics of chromium luminors. I. Gallium oxide. Part 1. Methods; Temperature and concentration dependence of luminescent spectra.
N. A. Tolstoi and Liu Shum-Fu, *Optics & Spectrosc.*, **12** (6), June 1962, 417.
- 19
538. Effect of the bond type of crystal phosphors on their electroluminescent ability.
A. N. Georgobiani, *Optics & Spectrosc.*, **12** (6), June 1962, 421.
- 19
539. Electroluminescence as ZnS phosphors under excitation by square pulses of different duration.
I. K. Vereshchagin, *Optics & Spectrosc.*, **12** (6), June 1962, 424.
- 19
540. The duration of photo- and radioluminescence of organic compounds.
S. F. Kilin, *Optics & Spectrosc.*, **12** (6), June 1962, 414–416.
- 19
541. Multilayer dielectric systems with films of unequal optical thickness.
R. S. Soklova and T. N. Krylova, *Optics & Spectrosc.*, **12** (6), June 1962, 437.
